RALLY & OFFROAD/RALLYCROSS/RACING

ALR TPX

The latest upgrade to the TPX family is a full spec three-way adjustable damper based on the WRC and S2000 products.

The new generation of TPX Rally dampers has proven themselves in the toughest of conditions.

This damper is a three-way adjustable damper with a Twin Piston McPherson strut and a 44 mm piston diameter. The outer tube is untreated and the adaption to each specific car needs to be made by an Öhlins distributor/service center.

The ALR TPX damper have a lot of new features, PDS (Progressive Damping System), latest developed shim settings and it will be delivered with complete instructions for welding and surface treatment of outer tube.
