APPLICATIONS FOR HARLEY DAVIDSON STREET 750 (2017-2018)

PART NO : HD 791 • PART NO : FSK 137

Customize your motorcycle with the special blackline edition of Öhlins twin suspension. Improve your handling and the bikes style with Öhlins STX 36 monotube high pressure gas type shock absorbers, with an internal reservoir in the main body. Spring preload is adjustable to suit your riding preference.

Öhlins FSK 137 kit for Harley Davidson Street 750 improves the performance of the standard front fork giving you better cornering and stability under braking. A preload adjuster is located at the top of each fork leg to match rider preferences. The parts included in this FSK kit will easily fit inside the original front fork and are easy to install.

STX 36 SHOCK ABSORBER FEATURES
